Radiation Protection, Committee on

As a Standing Institute Committee reporting to the Vice President for Research, the Committee on Radiation Protection (RPC) is responsible for establishing, maintaining and advancing a radiation protection program at the Institute and its off-campus sites. The RPC reviews and approves all uses of ionizing and non-ionizing radiation sources through a system of authorization/registration programs, risk assessments, and monitoring programs managed by the Radiation Protection Program (RPP). The RPC is also responsible for Institute compliance with radiation protection regulations and standards promulgated by local, state and federal agencies, and with the conditions of approval noted in the Institute's government-issued licenses. Within these parameters, the RPC works with students, staff and faculty to facilitate research projects using radiation sources of all types.
